👤 Profile

I am an **Informatic Engineer** with knowledge in application development methodologies and techniques using CSS, HTML, SQL, TypeScript, Java, and Git, as well as in the implementation of relational databases in SQL. I have experience working with various development frameworks, such as Angular, Spring Boot, and Ionic, and I am seeking opportunities to learn and improve my skills.

👛 Professional Experience

Cabin Counselor,
YMCA OF THE ROCKIES CAMP CHIEF ORAY
05/2024 – 08/2024 | Granby CO, United States

Cabin Counselor, *Daycholah CenterUCCI*
06/2023 – 08/2023
Green Lake WI, United States

Cabin Counselor, *YMCA Camp Gorham*
06/2022 – 08/2022
Darts Lake Eagle Bay NY, United States

🎓 Education

Informatic Engineer, *Institución Universitaria Colegio Mayor del Cauca*
2018 – 2024 | Colombia

🧠 Skills

Languages

- Java, HTML, CSS TypeScript, JavaScript y SQL

FrameWorks

- Spring Boot, Angular, Ionic, React, PostgreSQL

📁 Projects

Nuxten, Web Page

Development of a tool used to measure the usability of a software product based on the heuristic principles proposed by Jakob Nielsen.

- Developed in Angular for the FrontEnd and Spring Boot for handling requests to the PostgreSQL database in the Backend.
- It allows identifying issues and obtaining relevant information about the usability level of the software product.

SickPet, Mobil application - Android

SickPet is a mobile application created to manage the care of pets and animals by veterinary clinics and their owners.

- Built with the Angular - Ionic framework for mobile application development.
- Implementation of technologies such as Firebase Database, as well as APIs like the Maps JavaScript API and Directions API for handling routes in Google Maps.

Shoe Warehouse Management System

Development of an integrated system for managing a shoe warehouse, allowing control over inventory, handling purchase and monitoring the status of products. The system includes features for generating stock reports and sales analysis, optimizing management and real-time decision-making.

- Developed in Java using Spring Boot for request handling and RESTful services, and Hibernate for database management.
- Creation and tracking of purchase and sales orders.
- Custom reports on product performance and supplier efficiency.

🌐 Languages

Spanish

Native

English

Fluent (Understands and writes, speaks it).
